

Validated Practices

Reduce risk with a **verified ServiceNow Partner.**

Validated Practice recognised designations remove guesswork.

ServiceNow has independently reviewed our delivery outcomes and confirmed our practice is mature, repeatable, and client-proven.

What is a ServiceNow Validated Practice?

A ServiceNow Validated Practice is awarded after formal Partner Success Reviews.

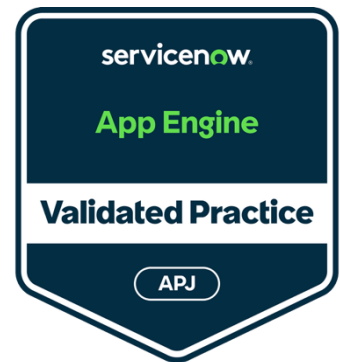

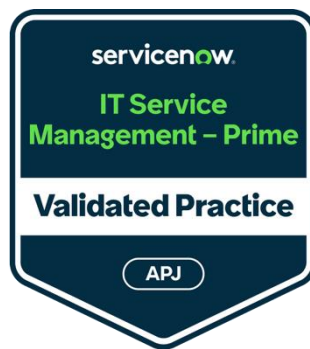

ServiceNow assesses:

- **Real implementation** outcomes
- Client **satisfaction evidence**
- Practice **maturity and consistency**

It is ServiceNow's way of telling customers: this partner has been tested.

We are trusted and recognised

A Validated Practice designation helps remove uncertainty and means ServiceNow has **independently reviewed** our delivery outcomes and **confirmed our practice** is mature, repeatable, and client-proven.

Derisk provider selection with a **verified ServiceNow Partner**

Choose a partner that **ServiceNow** itself has verified can deliver.

This means:

- Lower implementation risk
- Proven process maturity
- Verified delivery capability
- Access to advanced ServiceNow support channels
